

Wondering what's available in your community?

## Wokingham Information Network (WIN)

The Wokingham Information Network (or WIN for short) is a new service available to all residents in the Wokingham Borough. WIN is available both online and via telephone, and is a one-stop-shop for information about help, support and services for families, adults and vulnerable adults in the Wokingham Borough. Professionals working in the care sector and Children's Services can also use WIN to help and support people in finding local services.

Visit the Adult Information Directory section and discover more about:

- getting around in the borough
- local leisure activities
- local health services
- local charities and organisations

Visit the Family Service Directory and find information on:

- leisure activities for children and young people
- local health services
- early learning and childcare information
- family advice and support

...and much more!

Turn over to find out about information sessions being held in the New Year.

# Come and find out more!

We will be visiting different sites around the borough in early 2010 to offer advice and information on using the service. Why not come along to one of the below information sessions and find out more about WIN?

|           |              |  |
