WE ARE HOLDING THE ANNUAL MOTH NIGHT ON **FRIDAY 29th July from 8.30 p.m.onwards**

For those of you who have not heard of this before; we carry out surveys of the moths that visit Greenshoots.

You might ask why is this important? The study of moths, and the correct identification of the many 'little brown jobs', is important for two main reasons:

1. We need moths as plant pollinators because of declining bee populations.
2. Their short life cycles make population trends good indicators of climate and habitat change.

Greenshoots have been participating in this national survey for several years; the good news for us is we have a healthy and diverse moth population, which is an indicator of good site management.

Refreshments including homemade cakes will be served during the evening

There is no charge, however all donations towards refreshments will be gratefully received

From our experience we know children particularly enjoy this type of event, however we must emphasise they must be supervised by an adult at all times, or they may be asked to leave

All we ask is you email Denise - denise@waysandmeans.org.uk (or phone her, 0118 948 1944), to say you are thinking of coming - we do need some idea of numbers so we don't run out of cups!

Please note this event will be cancelled if the weather is wet.

The little 'brown jobbies' don't like the rain! Please call us to check on the day, if the weather looks suspect 😊

Greenshoots is part of The Ways and Means Trust Ltd a registered charity, which helps adults with disabilities to improve their skills to gain employment.
